Deadline for  
manuscript submissions:  
**30 November 2021**

### Message from the Guest Editors

Good land administration helps to secure property tenures. It also protects the land rights of people (including individuals, communities, and the state) through good governance principles and practices. Therefore, probing land administration practices—whether in developed or developing countries—is essential to developing tools or methods for securing natural resource rights for people, especially for the youth and women. A broad knowledge gap exists on the land/water/forest–people–health–wellbeing nexus of natural resource administration research and practice. This Special Issue will present insights into theories and practices in land administration in the context of the land/water/forest–people–health–wellbeing nexus.

We invite the submission of conceptual papers, case studies, field research papers, and review articles focusing on (but not limited to) the following themes: land administration, property sciences, urban, peri-urban and rural land/water/forest administration, consequences of COVID-19 on land and the environment; land administration and women/youth land rights, planning, urban–rural land linkages, responsible governance of tenure, societal transformations, and associated themes.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** Indexed in the Social Sciences Citation Index (SSCI - Web of Science), Scopus (2019 CiteScore: 2.8) and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 12.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2020).
